

#### Exercise 4: Start your search

Do some preliminary searching to get an idea of what homes are available.

It's a good idea to speak with a real estate agent at this point. Share your dream home blueprint with the agent. See what they have to share as far as homes in that location.

At this point refine your dream home blueprint if;

1. You find something on the market you like but did not include in your blueprint

OR

2. Some of the things in your blueprint are not available in the area / price range you are looking in.
