

YOUTH FEARS AROUND THE GLOBE

All participants

10 min

Second trainer distributes the Handout (HO-1). Lead trainer gives instruction by asking the group to connect the dots and guess which country youth fears which image from the handout.

Allow 5 minutes for completion of this exercise.

Then give the participants the correct answers and briefly comment on youth fears today across the globe and within their own countries based on the images presented on the HO-1. You may for instance comment on how indeed our fears depend on the circumstances we live in to a large extent. Whereas some fears are commonly present in people's lives, e.g. fear of the dark, fear of falling, some other are made by our life experiences and expectations, e.g. war, bombing, nuclear explosion, sharks, etc. What about your experiences of common (youth) fears in your native countries?

This exercise will help to better understand fears
