

TASK: TEAM ARCHITECT

All participants, small groups up to 4 persons

20 min (10+10)

Start the session by dividing your participants into 4 groups by pointing at participants one by one, and loudly counting 1, 2, 3, 4, and repeating this until all participants are divided into one of four groups.

Provide each group with a bag of popcorns and tooth sticks and tell them that they have 10 minutes to build a tower from the given material that should be as stable as possible.

Participants are not allowed to use verbal communication during their work.

Once time limit expires, comment on the towers and open the discussion on: how did you feel working on this task, what was your strategy, how did you communicate, what was the problem.

This task is about testing participants' team work abilities. Team Architect is basically a game where you get each team to build something with very little amounts of strange materials. For example, you could give each team a packet of pop sticks and a roll of sticky tape and get them to build a bridge which will support a heavy book.

Bags of popcorns, tooth sticks
