

## DISCUSSION FRAMEWORK: INTROSPECTION

All participants

30 minutes

After the participants completed the **Business Pitching (Ins-16)** simulation, a discussion should be opened during which the participants will have the opportunity to examine the change in their attitudes, knowledge and business skills by using introspection method. Questions that can help the trainer direct the course of discussion to productive conclusions and the introspective considerations of participants are:

1. Have you changed something in your attitude towards entrepreneurship? What were your views before this training and what are they at the end of the training, do you see a change, and can you tell us what has changed?
2. What influenced the change of attitudes? Were you aware when this happened and what was the moment, the training segment, the section or the point of learning, which influenced the change of your attitudes?
3. How do you see yourself and your future career now?
4. What was most useful in this training? Which training segment was the most interesting or most useful one for you and why?
5. How will you use the knowledge, skills, attitudes and experiences gained in this training? Where will you be able to apply them?

Reflecting on the process of learning and acquiring new knowledge and skills and changing attitudes.
